Thanks, Dante.

Looks good.

To: Seter, David; Oman, Jack; 'PG John N. Batchelder'; Jeryl Gardner
Subject: NOTES: EPA-NDEP-ARC monthly call

Participants: John Batchelder & Jack Oman (ARC), Jeryl Gardner (NDEP), Dave Seter & Dante Rodriguez (EPA)

OUI: Dave, background water quality report. Jack, has draft on his desk, to agencies later this month. Dave, what to present at Aug 6 evening community meeting? Looking for ideas, is background something? Any other ideas? Jack, could do, would want something tangible to explain, will ponder background. Dave, worth introducing concept. John, how relates to remedy. Dante, building blocks, what is the concept, drinking water standards, any number or definition we are ready to present. Dave, 45-60 minutes of presentation, up to an hour of Q&A, overview of status in Superfund process, well maps, background concept, will give more thought and coordinate with team, 5-10 minutes on background. Risk? Dave and Sophia working on response to Jack, agree on 3 tech memo approach, present some basic concepts at public meeting, what a risk assessment is, etc. Setup call to discuss tech memo 1 re: csm. Schedules: Jack out 6/24-7/1, week of 7/13 better, in Yerington 7/7; Jeryl out 6/12-7/7 in field mostly, in office 6/29-30 and is booked up, could do 7/6-7, week of 7/13 ok, in field week of 7/20; will shoot for week of 7/13, get answers by then.

Jack, sent out report for well installation today, started drilling next ones, report on that will be addendum.

OU1 technical meeting in conjunction with August trip, maybe Wed 8/5, holding both days open as possible. Let know if anyone has restrictions. Agenda topics?

OU3: Dave, HHRA discussion can cover OU3 along with OU1. RI report underway? Jack would like scoping discussion on RI report, sent Dave table of contents. Question of how State handles OU3, put on agenda for July 10, Dave can discuss with Angeles.

OU4: Field work, impact of rain? Jack, Phase 1a field work done, awaiting lab results, when receive, schedule meeting to discuss. Who to involve? Discussion of Phase 1b activities. Standing water in ponds, mud slide on a road. Later is summer hope for dry enough conditions to get into ponds for Phase 1b sampling. Dave, will give ARC feedback in August tech meeting, to facilitate timely Phase 1b work.

OU7: Jack, will send CSM by end of June, along with DQOs, next step would be FSP, have begun internally, reach consensus on CSM/DQOs quickly, submit sampling approach soon thereafter. Lets do call or meeting after review for week or so. Jeryl, BLM and SPS may be interested later but maybe not at this stage. Dave Davis, new BLM guy. I could ask BLM/SPS how they want to be involved. July 23, PM (AM alt) for 2 hour call. Jack to get back to me, I will check with CBI, YPT.

OU8: FMS, Jack received my reply for Phase I pond and fill testing B and C ponds, Rich Mattucci will organize, stay tuned for rough schedule. Site visit, me come June 29, Jack will let them know, I will just check in at office and they will be ready. Dante to send Jack email.

Jeryl sent closure plan, on SharePoint site, worked fine, Peggy was able to access no problem.

Extended NDEP deadline to June 30, Jack on track to respond by end of month. Greg taking lead on drafting agenda for July 10 meeting, we will offer any input, like OU3.

Sitewide: Jeryl received ARC comments on site-wide timeline, will compile and submit to Greg, who will distribute to group.
